

Design and Synthesis of Functional Biomaterials

David A. Putnam

Prof. David Putnam joined the College of Engineering at Cornell University in 2002. Prior to joining the engineering faculty, he was an NIH postdoctoral fellow in the Department of Chemical Engineering at MIT in the laboratory of Professor Robert Langer. He received his B.S. in Pharmacy from Union University and his Ph.D. in Pharmaceutical Chemistry from the University of Utah. The research conducted by David Putnam is focused on the rational design and synthesis of functional biomaterials to facilitate, target, or control the delivery of drugs or therapeutic genes to the body.

Honors and positions:

Editorial Advisory Board, Biomacromolecules

Editorial Advisory Board, Journal of Applied Polymer Science

Editorial Advisory Board, Advanced Drug Delivery Reviews
